

## Q366 RESET

**STAMPING** Q 366 RESET 2002

**USGS QUAD MAP** MOUNT WASHBURN (1986)

**NGS PID**

**LATITUDE** 44.80054499

**LONGITUDE** -110.4450585

**ELEVATION** 2703 m

---

**DATE OF DESCRIPTION** 2002

**DESCRIPTION** Proceed 6.35 mi north along the Canyon-Tower highway from the junction at Canyon Village. Bench mark is about 15 m east of the centerline of the highway, about 2 m south of the low point of a stream, near a graveled pullout that is just south of the stream (a stone headwall for a culvert that allows water to pass under the highway is at the intersection of the pullout and stream), and about 1.0 m above the highway.

This bench mark was installed in 2002 as a replacement for Q366 (PID: PY0999), which was destroyed roadwork that year.

Looking east from highway at bench mark (beneath yellow case).

Looking south along highway at bench mark (beneath yellow case) and pullout.

Close up of bench mark.
